

EHS Procedure QuickCard

FC-GL-EHS-MAN-0401: Emergency Preparedness

High Likelihood	Cat 1	Cat 2	Cat 3
Medium Likelihood	Cat 1	Cat 2	Cat 2
Low Likelihood	N/A	Cat 1	Cat 2
	Low impact	Medium impact	High impact

- **Category N – Green (Monitoring).** Apart from situation monitoring, no action required.
- **Category 1 - Yellow (Be Aware).** Severe weather is possible over the next few days and could have some impact on (daily activities). For example - Travel disruption. Site leads (Site Manager, Supervisor, Site EHS) are required to keep monitoring the weather changes and utilise forecasts to assess the extent of impact, especially if the weather is expected to get worse. Site personnel must be made aware of the potential impact.
- **Category 2 - Amber (Be prepared).** An increased likelihood of bad weather affecting employees, contractors, visitors. For example - travel delays, road closures. People should be prepared to change their plans to make sure that everybody stays safe from the impact of the weather.
- **Category 3 - Red (Take action).** Inclement weather will cause significant impacts. For example - damage to buildings and roads. Direct risk to people's lives if control measures were not taken. All personnel must stay away from areas which could be potentially dangerous and they should follow the advice of the emergency services and local authorities. Site leads (Site Manager, Supervisor, Site EHS) should be prepared to evacuate team to safer and more convenient premises (including homes and hotels) at least 3 hours prior to Red Weather Warning in the area with 60% confidence.

Key Changes

- Replaces and supersedes
 - FC-GL-EHS-MAN-0401: Emergency Preparedness (Issue 2)
- Changes to section 2, adding Severe Weather section (2.10)
- Severe weather risk rating (traffic light system categories) (2.10.1).
- Details on weather monitoring (2.10.2).

Key Tools

- No changes to issue 2 tools apart from appendix A: lightning
- Appendix A: Severe Weather examples
 - Table 1: Lightning Safety
 - Table 2: Heat wave, hot weather Safety
 - Table 3: Wildfires/Smoke
 - Table 4: Floods: Heavy Rainfall Safety
 - Table 5: Snowstorm Safety
 - Table 6: Tornado Safety
 - Table 7: High Wind Safety
 - Table 8: Typhoon, Hurricane, or Cyclone Safety

Further Work / Support

- Full Implementation by: 31 Dec 2022
