

Alberta Association for Safety Partnerships

REQUIREMENTS OF THE COR/SECOR PROGRAM

Congratulations on completing the process to achieve your Certificate of Recognition. If you have been awarded a 3 year COR or SECOR it is important to note you will need to complete and submit annual maintenance audits (for COR) and self-assessments (for SECOR) in the next two calendar years to keep your certificate active.

We will be sending out a reminder email two months prior to the anniversary date of your audit completion date, regarding conducting and Internal audit (for COR) or submitting your self-assessment (for SECOR).

For maintenance years, as long as you conduct your audit in the calendar year you are compliant, but it is a better practice to complete your audit/self-assessment at the same time every year so that you have a full year in between evaluations.

- For annual COR maintenance you have the choice to train an Internal Auditor (mandatory training is Module 1 & Module 12 prior to conducting the audit) or you can hire an External Auditor to complete these annual audits. You can find a listing of our current External auditors on our website – www.aasp.ca
- For SECOR maintenance you must conduct a Self-Assessment every year and submit currently dated material (dated within the last year for the date of the audit) labelled with the question it supports. The Self-Assessor that is completing this document must have completed the mandatory training (Module 1 or Module 1 SECOR Refresher) within the last three years. A copy of the SECOR Self-Assessment is available for download on the home page of our website,

Thank you for participating in the COR/SECOR program and for choosing the AASP as your Certifying Partner.
