

TITLE:
TASK RISK ASSESSMENT

DOCUMENT NUMBER:
FC-GL-EHS-MAN-0501-F3

REGION:
GLOBAL

ISSUE:
5

DATE:
30-April-2020

PAGE
1 of 1

WORK ACTIVITY:	REFERENCE NUMBER (Reference Procedure)	WDI Rev. No.	Date:
Office Work Generic	TRA_Office Work_Generic	N/A	14th June 2022

PERSONNEL IMPACTED (Tick all applicable)

☒ FieldCore Employees ☒ GE Employees ☒ Customer ☒ Contractors ☒ Affiliates ☒ Public ☐ Others (Specify) _____

Severity	Frequency	SEVERITY	Risk Rating	Strategy
		S1 S2 S3 S4 S5		Intervention - (Critical Step)
S5 Major	F5 Monthly	F5 5 6 7 8 9	High	PPE cannot be assigned as a Primary Defense
S4 Severe	F4 Quarterly	F4 4 5 6 7 8	Medium	Control
S3 Significant	F3 Annually	F3 3 4 5 6 7		Do not proceed - additional defenses required
S2 Moderate	F2 Bi-Annually	F2 2 3 4 5 6	Low	Monitor
S1 Minor	F1 > two years	F1 1 2 3 4 5		Maintain Defenses

*Risk = (Severity + Frequency) -1

TASK STEPS		POTENTIAL RISK (PR)				DEFENSES:	CONTROLLED RISK (CR)			
		HAZARDS:	S	F	PR*		S	F	CR*	SAFE METHOD OF WORK
1	Covid/Viruses	Viruses	3	3	5	Cleaning, Disinfectant, Medical Testing, Social Distance, Face Mask, Ventilation	2	2	3	Ensure any symptoms of Covid are recognised and affect persons are isolated until negative results can be assured. Ensure country specific requirements are met.
2	Walking around office location	Uneven Walking Surface, Hidden Steps, Liquid on floor, Trailing Cables, Poor Lighting, Obstacles in pathway	1	5	5	Cleaning, Good lighting, Organised Storage, Concern Reporting	1	1	1	There should be no material stored in walkways. Cables should be routed or correctly covered to ensure they do not become trip hazards. Any spills should be cleaned up or barriered off straight away. Lighting levels should be maintained to ensure that walking pathways are well lit.
3	Use of electrical equipment	Electricity, Fire/Smoke, Escaping/Wasted Energy	4	3	6	Electrical Inspection, Electrical Protection Devices, Audible Alarm, Smoke Alarm, Emergency Response Program, First Aid, Fire Fighting Equipment, Energy Management Program	1	1	1	Electrical protection such as RCD/GFCI and MCB should be installed into electrical system. These should be tested in accordance with OEM instructions. Fire fighting equipment for use on electrical fires must be readily available and not block or obstructed by materials. There should be a system to warn of fire and to evacuate to a known safe evacuation point. Electrical items should be switched off when not required for use to save electrical energy from being wasted.
4	Heating and Cooling of office	Thermal Distress, Stress, Fire/Smoke	3	2	4	HVAC Maintenance, Ventilation, Temperature monitors	1	1	1	The office should have good natural ventilation levels. Heating and Cooling systems should be in place to prevent heat stress or thermal distress from the cold. The HVAC systems should be certified or maintained in safe and efficient working order.
5	Use of sanitary systems	Viruses, Chemicals	1	4	4	Cleaning, Disinfectant, Chemical Storage, Concern Reporting	1	2	2	Sanitary systems should be clean and handwashing facilities should be in place with soap and clean towels or air driers. The sanitary facilities should be periodically inspected to ensure they are in good order and employees should be encouraged to raise concern reports when the hygiene levels or availability of require sanitary materials is compromised.
6	Eating and Drinking	Waste, Chemicals, Harmful Bacteria	1	4	4	Refrigeration, Disinfectant, Cleaning	1	2	2	Food should be stored correctly and waste food needs to be placed in the waste correctly. Out of date food should be disposed of. Hand washing facilities should be in place in meal areas. Harmful chemical should not be kept in food eating and social areas.
7	Control of Visitors	Security Lapse, Fire/Smoke, Chemicals	1	4	4	Induction, Emergency Response Program	1	1	1	All visitors should undertake induction to understand site rules and emergency arrangements. Access of visitors should be controlled to ensure they are not able to access area and information that may be commercially sensitive.

8	Waste Management	Waste	1	5	5	Waste Management	2	1	2	Waste must be segregated correctly to separate hazardous and non-hazardous waste streams. Recycling systems should be in place to encourage good waste management practice. Waste receptacles should be clearly marked with the type of waste that can be accepted.
9	Managing the building infrastructure	Asbestos, Falling Objects, Roof Leaks, Escaping/Wasted Energy	3	3	5	Concern Reporting, Maintenance and Inspection Program, Warning Labels, Barriers	3	1	3	Buildings should be examined for the presence of Asbestos and where there is asbestos an Asbestos Management Program must be introduced. The building infrastructure should be periodically checked to ensure there are not structural issues that may cause harm. Where there are issues with a building that may cause harm then the area should be labelled and barriered off pending repair or remediation.

EQUIPMENT / MATERIAL / PPE REQUIRED										
Cleaning contract. Refrigerator. Chemical Storage. Maintenance Contract. Recycling Bins. Face Masks. Barriers. Fire Fighting Equipment
