

EHS Procedure QuickCard

FC-EU-EHS-HEA-0801-1: Management of Vibration Exposure

Key Elements & Changes

EU Specific Procedure – Being piloted in UK Q4 2020

Covers;

- Tool Vibration Magnitudes – *The levels for all the tools FieldCore uses*
- Risk Management - How we determine risk and to whom
- Training – *What information you need*
- Monitoring – *How we will check the vibration levels on tools*
- Health Surveillance – *How we are going to ensure that our controls are working and the health workforce is maintained*

Scope:

All FieldCore work locations / workforce where exposure to vibration requires a risk assessment, under the UK & EU legislative requirements

EHS Pulse – Tool vibration data matrix

Rollout from : 1 Jan 2021 (UK) then with the Europe region through 2021.

This purpose of this procedure is to specify how FieldCore ensures adequate controls, to limit exposure to vibration in the workplace, are implemented and that employees are provided with adequate information concerning the risks. To protect them from the health hazards associated with tool vibration
