

EHS Procedure QuickCard

FC-GL-EHS-SAF-0806: Control of Asbestos

Asbestos in FieldCore Owned or Occupied Premises (Fixed Facilities)

Asbestos on Project/Customer Sites

Key Changes

- Replaces and supersedes FC-GL-EHS-SAF-15A: Control of Asbestos
- Integrates legacy Granite/PGS and Alstom procedures
- Completely re-written with change in emphasis from working with ACM to employing qualified Contractors to perform any ACB abatement works
- More focus on management of asbestos on FieldCore fixed facilities, risk mitigation through the ITO process and project planning

Key Tools

Several new tool and guidance documents, including:

- ACM Permit to Work
- Customer Asbestos Questionnaire
- Bid Risk Assessment - ACM Work
- Asbestos Exposure Risk Assessment
- Tender / Bid Phase Decision Tree
- Selection of ACM Qualified Contractors - Guidance

Further Work / Support

- Improve ITO process , working with Power Services
- Implement deviation request process , when due to technical constraints it is not possible to employ qualified contractors for ACM removal e.g. generator windings

Full Implementation by: 31st May 2018
