Our impact

Our foundation:
Where we came from

1879

Thomas Edison pioneers the invention of the carbon filament light bulb, revolutionizing electric lighting.

1892 - 2023

For 130 years, our energy businesses have grown as part of General Electric, helping to pioneer innovation, advance technology, and shape the future of the industry.

2024

Following its separation from General Electric, GE Vernova emerged as an independent company, positioned to lead the global transition to sustainable energy. Twelve energy businesses united under one company, one team, and one brand—**GE Vernova**—driven by a shared mission to electrify and decarbonize the world.

When GE Vernova formed as an independent company, it was important to show that the separation from GE was a symbol of change—not just a change of symbol.

The future of energy will be different.
We must be different, too.

Our foundation:
Key message

Our brand identity embodies the
confidence behind our innovation,
the **urgency** of our mission, and the
shared **energy** of a team driving the
Energy of Change forward.

Our name: Different on purpose

We are **GE Vernova**.

We proudly carry forward our legacy with “GE,” a symbol of trusted quality and breakthrough innovation earned over generations.

“Ver,” from *verde* and *verdant*, speaks to Earth’s thriving, green ecosystems. “Nova,” derived from the Latin *novus*, points to an innovative, lower-carbon future—one we are helping to accelerate every day.

GE Vernova sounds different, because it is. We’re not just adapting to the future, we’re shaping it. With **urgency and purpose**, we are acting decisively to help build a cleaner, more sustainable future. This is not business as usual. This is a business built for impact—purpose-built to lead the new era of energy.

“Ver” signals the lush and vibrant greens and blues of Earth.

“Nova,” from the Latin *novus*, nods to a new, innovative era for energy.

GE VERNOVA

Purpose: Why we exist

Our Purpose is the reason we exist and what we aim to achieve for people. It's also the rallying cry that guides us and gives our work meaning. Like a North Star, our Purpose isn't a destination, but a perpetual guide as we work to decarbonize all possible aspects of modern life.

Affordable, reliable, sustainable.

Improving lives and the planet.

The Energy to Change the World

Together, we are the powerful, unified force with the energy to change the world.

Lead the transition into a new era of energy—solve the trilemma.

Global scale and impact.

Mission: What we do

Our Mission defines the impact we strive to make in the world through our work.

We **electrify to thrive and decarbonize**. These two goals are not separate—they are fundamentally connected. Electrification powers economies and communities; decarbonization ensures their sustainability. One enables the other.

Electricity plays a vital role in unlocking opportunity and improving lives. There is no progress without power. Our Mission reflects the magnitude and urgency of our responsibility, as well as the optimism we carry and the promise of what’s possible.

ELECTRIFY TO THRIVE AND DECARBONIZE

Brand platform: The Energy of Change

Inspired by our Purpose, this is the creative platform behind our brand storytelling. It's not a replacement for our Purpose, nor is it a tagline. Rather, it's a multi-year, multi-chapter campaign designed to bring our Mission to life in ways that engage, inspire, and evolve with the world around us.

Important to remember

- Our Purpose—*The Energy to Change the World*—remains unchanged.
- *The Energy of Change* is a campaign platform, not a formal tagline.
- The Platform should never be visually locked up with the GE Vernova logo or name.

*Please refer to *The Energy of Change* guidelines for more details.

THE ENERGY OF CHANGE

Brand feel: Our impact

Our brand feel is the mindset that inspires everything we do—telling the same story, and brand attributes, but through a mood or feeling. The way we look, talk, and act as a company? All are driven by our brand feel, which codifies the consistent, unmistakable sensation running through all GE Vernova interactions.

ALL IN

Brand attributes

- Proven

We lead with confidence as a trusted authority with 130 years of experience.
- Transparent

We are honest and display everything clearly—there’s no fine print.
- Brave

We have the courage to take a stand and disrupt an industry.
- Dynamic

We are flexible and agile, always adapting and moving with energy.
