Priority 1: Safety & Building a Robust Safety Culture Status: On Track (Exceeding Targets)
 Summary: Maintained a perfect safety record with zero incidents and zero first-aid cases YTD. Actively fostered a safety-first environment at the Houston Learning Center (HLC) by leading the Aero team to a 1st place finish in the April 5S initiative. This effort directly supports our goal of creating a cleaner, safer, and more standardized training environment.

Priority 2: Training Execution, Instructor Qualification & Content Quality Status: On Track
 Summary: Delivered consistent high-performance results, evidenced by a 97 NPS score for Aero product line training. Successfully pioneered an AI-enabled development workflow, producing the "Aeroderivative General Maintenance Practices" course (8 modules/43 competencies), which leadership has validated as a production-level model. Following a Q1 ramp-up, I successfully hit the 95% Timecard OTD target in April. May's performance (76%) was an outlier due to scheduled vacation; I am focused on process stabilization to maintain consistency through H2.

Priority 3: Execution of Action Plan Status: On Track
 Summary: Successfully executed lead items for the 2026 Action Plan, including the Aero FME Online Training and E-Tools curriculum. As the central point of contact for HLC Capital Expenditures, I am currently managing a

portfolio of 39 assets valued at ~\$2.95M. This responsibility ensures that our training teams have the high-fidelity tooling (e.g., turbine mock-ups and controller hardware).

Priority 4: Organizational Development & Employee Engagement Status: On Track
Summary: Actively modeling the "GE Vernova Way" by taking ownership of team-wide operational challenges. During the extended absence of a key team member, I proactively reallocated project resources and adjusted schedules to ensure project continuity. I am currently navigating complex OJT sourcing requirements and skill-gap challenges, consistently finding creative scheduling solutions to ensure our training delivery remains uninterrupted despite these constraints.

Employee Evaluation

- Comment:
- **Innovation:** Demonstrated a founder's mindset by pioneering the team's first AI-enabled development workflow for course creation. This production-level success has provided a scalable model for the organization, allowing us to accelerate content delivery with both speed and courage.
 - **Customers:** Maintained a 97 NPS score in Aero product line training, consistently prioritizing customer-valued outcomes. Proactively managed a \$2.95M CapEx portfolio to ensure our training instructors are equipped with the exact tooling required to deliver high-quality, impactful instruction.
 - **Lean:** Embraced Lean principles as a daily compass. I achieved a 96% Timecard OTD in April and led the Aero team to a 1st place finish in the April 5S event. I consistently use data-driven problem solving to optimize our training environment and improve operational efficiency.
 - **One Team:** Operated as a supportive team player by serving as the primary procurement and logistics lead for the entire HLC team. By managing the end-to-end CapEx process for other Product Line Leaders (PLLs), I ensured that all instructors were equipped with the necessary tooling to succeed.

- **Accountable:** I take individual and collective ownership of our delivery commitments. When a key team member was unexpectedly absent, I took immediate accountability for the resulting schedule gaps, proactively reallocating resources and re-prioritizing project work to ensure that all scheduled training remained on track. By navigating these personnel challenges and complex technical sourcing requirements with transparency and urgency, I ensured we met our commitments to both the business and our customers.
