Introduction

Our primary typefaces, Sons Condensed and Inter, are used for all communications. Paired with our logo, Sons Condensed and Inter are a visual representation of who we are as a brand: engineered, trusted, and energetic.

Both letterforms display a balance between soft curves and precise corners. The bold letterforms of Sons Condensed especially complement the structured, wide type of the GE Vernova wordmark.

For non-Latin languages, Noto Sans is our preferred typeface. Consult with local and regional teams regarding preferred system fonts for non-Latin language offices.

Our legacy custom fonts, GE Inspira Sans and GE Inspira Serif, have been retired and should no longer be used in any application.

Our primary typefaces are **SONS CONDENSED** and Inter

Tall, square stature captures our boldness.

N

Rounded curves signify our sophistication and expertise.

R

Primary typefaces

We use **Sons Condensed**, by Klim Type Foundry*, as our primary typeface. We limit usage to two weights, Extrabold and Semibold, for headlines, subheads, and key text.

Inter, our other primary typeface, is also limited to six weights. We use both Regular and Semi Bold for headlines and Regular for body copy. Italics are reserved for establishing hierarchy and highlighting key information.

Both Sons Condensed and Inter are the preferred typefaces across all Microsoft Office documents, including PowerPoint and Word, with the exception of email, which will use **Arial**.

For blueprints, CAD drawing tools, contracts, legal forms, and other cases where Inter cannot be used, replace it with Arial to minimize text reflow.

*All vendors must purchase a license for Sons Condensed in order to be compliant with the Klim Type Foundry license agreement.

Hierarchy

Sons Condensed

We use Sons Condensed Extrabold for headlines (H1) and Semibold for subheads (H4) to capture our tone of voice. Set with optical kerning, the leading of headlines is 90% of the point size, with no additional spacing or tracking. For Semibold subheads, the leading is also 90% of the point size with 15 pt tracking to improve legibility.

Sons Condensed should **always be set in all caps** with the exception of program names set in the same font.

Inter

For extended headlines or to establish the right tone, we use Inter Regular (H2) and Semi Bold (H3) with 20% extra leading. H2 and H3 serve as a gateway for expanded content, offering a more detailed narrative than traditional brief headlines or bold, one-to-three word statements.

When we set body copy and captions, we also use Inter Regular with 20% extra leading for increased legibility at smaller sizes.

H1
Sons Condensed
Extrabold

Non-Latin languages

For text written in non-Latin languages, we use **Noto Sans**: A Typeface For The World.

The Noto fonts are perfect for harmonious, aesthetic, and typographically correct global communication, in more than 1,000 languages and over 150 writing systems.

Use Black weight for headlines and Regular for body copy.

Follow the typography specifications and the design examples in these guidelines as reference for color combinations and layout when setting non-Latin text.

заголовки

Его прабабушка была тунгусской княжной Гантимуровой, а отец — троюродным братом известного психиатра В. Х. Кандинского. Философ Александр Кожев приходился ему племянником.

Don'ts

Our typography is an essential part of our visual identity. Consistency and legibility should always be considered. The following are some examples of possible misuse:

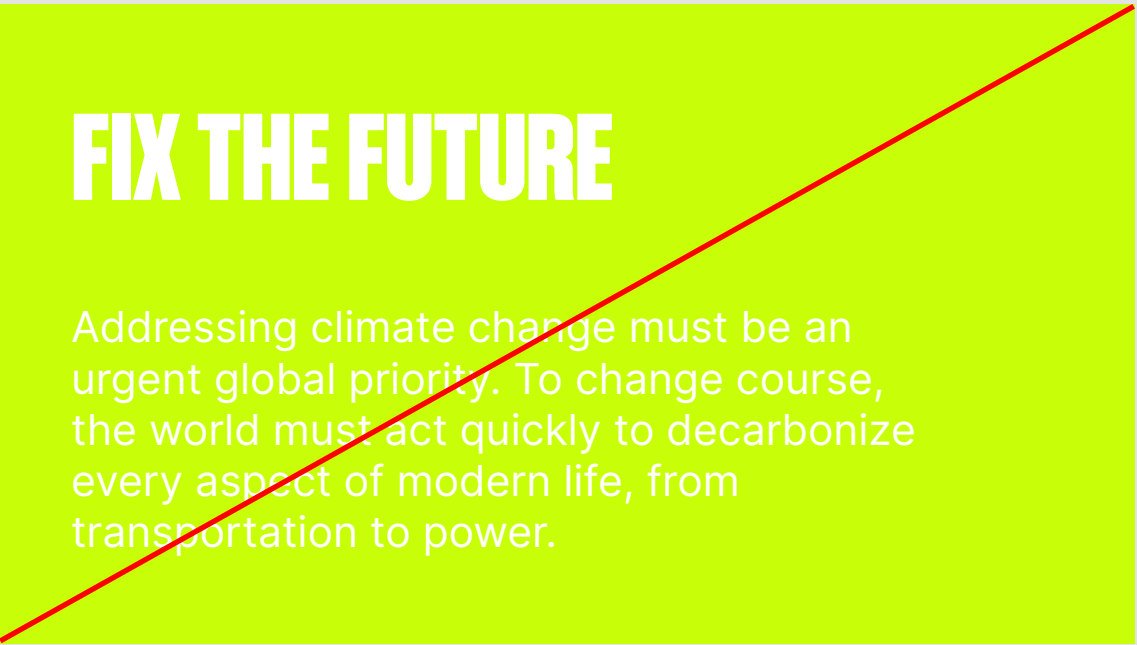

- 1. Do not use sentence case or lowercase for headlines set in Sons Condensed
- 2. Do not use title case for headlines set in Sons Condensed
- 3. Do not use low-contrast color combinations with text and background colors
- 4. Do not place text over a busy background; make sure there is enough contrast for legibility. If necessary, you can apply a Night overlay at 15%–20% opacity to make text more legible
- 5. Do not use gray type
- 6. Do not skew or distort text, or apply drop shadows, outer glows, or other effects
- 7. Do not rotate typography to anything other than 90°
- 8. Do not use Sons Condensed for body copy or Inter in all caps for headlines
- 9. Do not use unapproved fonts
